Subject: Proposal to erect communications tower at The Oaks Airfield
To whom it may concern,

The Oaks airfield is the last remaining satellite airfield in the Sydney basin constructed during the second world war.

This airfield has been used by sport aviation including Southern Cross Gliding Club for out-landing training for many years since the war.

I consider the proposal to erect a communications tower in the immediate vicinity of the runway to be a major safety issue. This airfield is home to a number fo sport aircraft and construction of this tower would prejudice their safe operation.

I have been involved in aviation for over 40 years in Camden area and consider safety an important issue.

Yours faithfully,

John Dall

Tug Master

Southern Cross Gliding Club
